

Customising Menus in PowerProducer

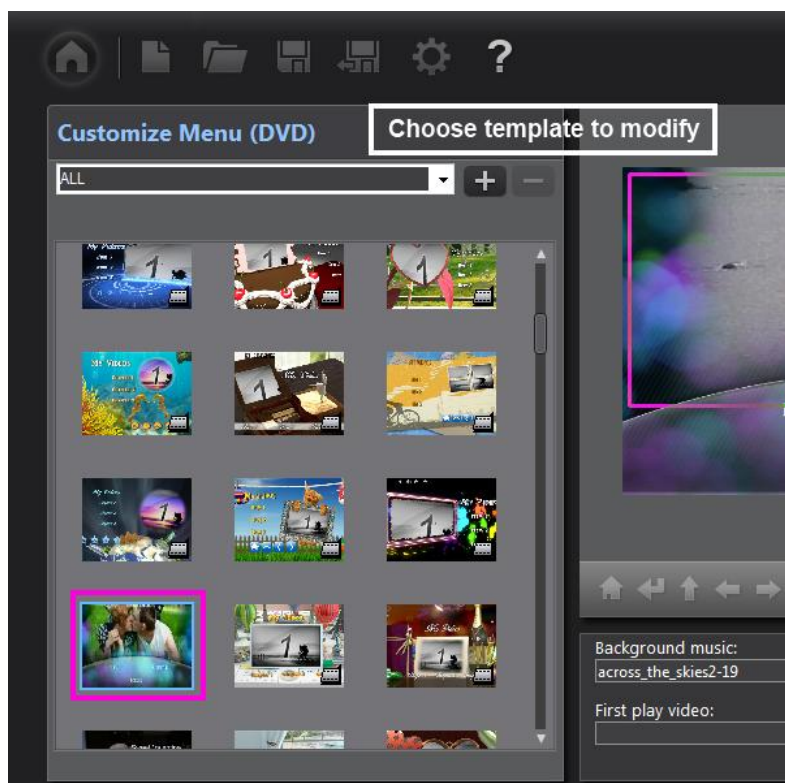

In **PowerProducer**, there is no option to create a new menu from scratch. Many existing templates can be modified by changing the background image or video, reformatting fonts & screen layout etc.

This is a **step-by-step guide** to customising a menu in **PowerProducer** using an existing template.

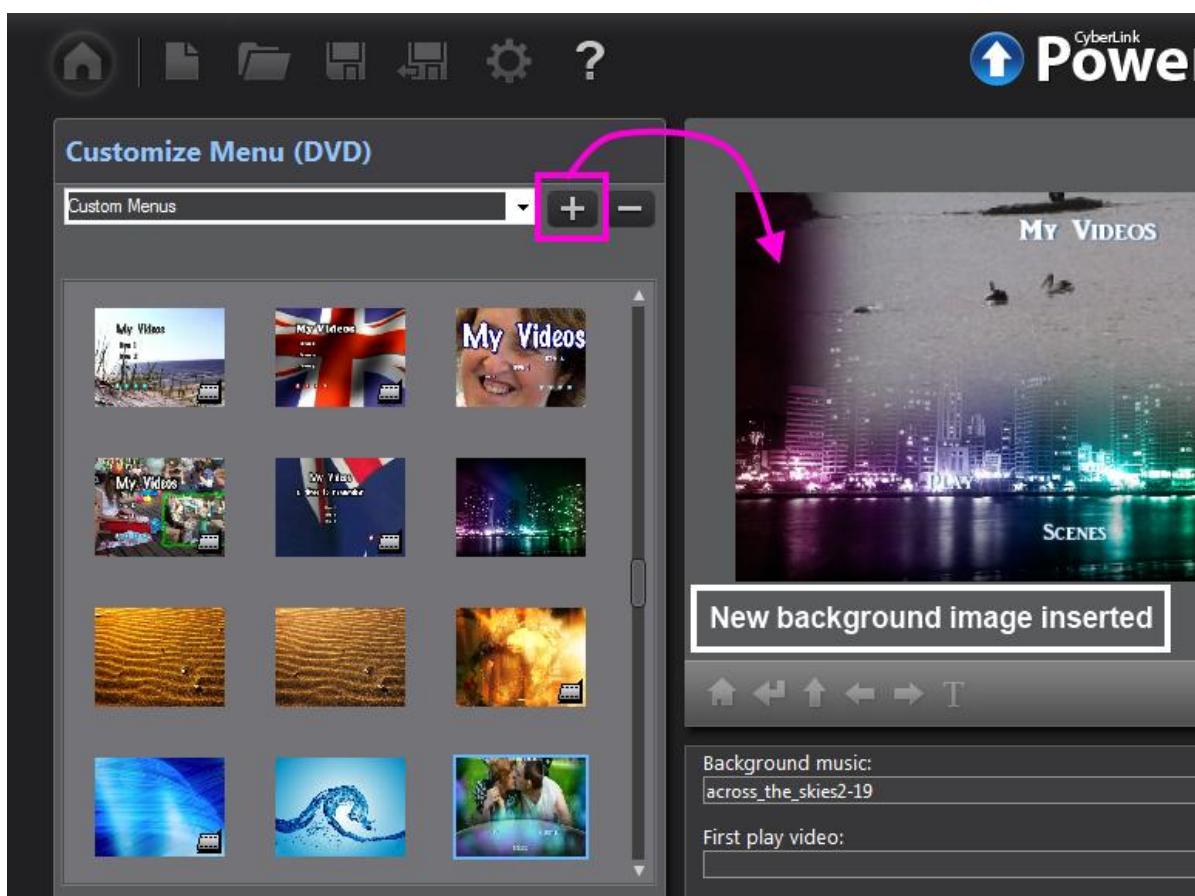

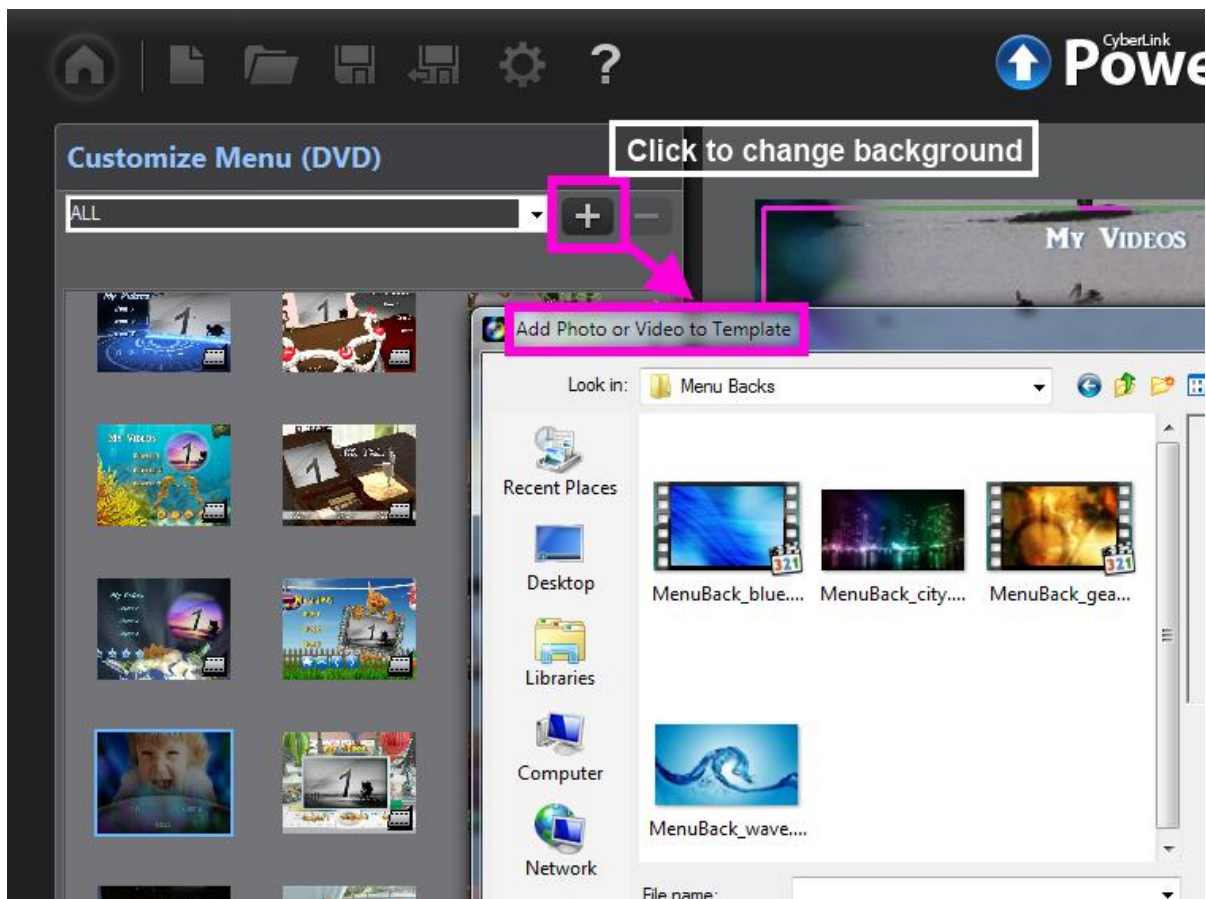

1. Select the disc format options required:

2. Choose a template to customise:

3. Click the **+** button to change the background image or video

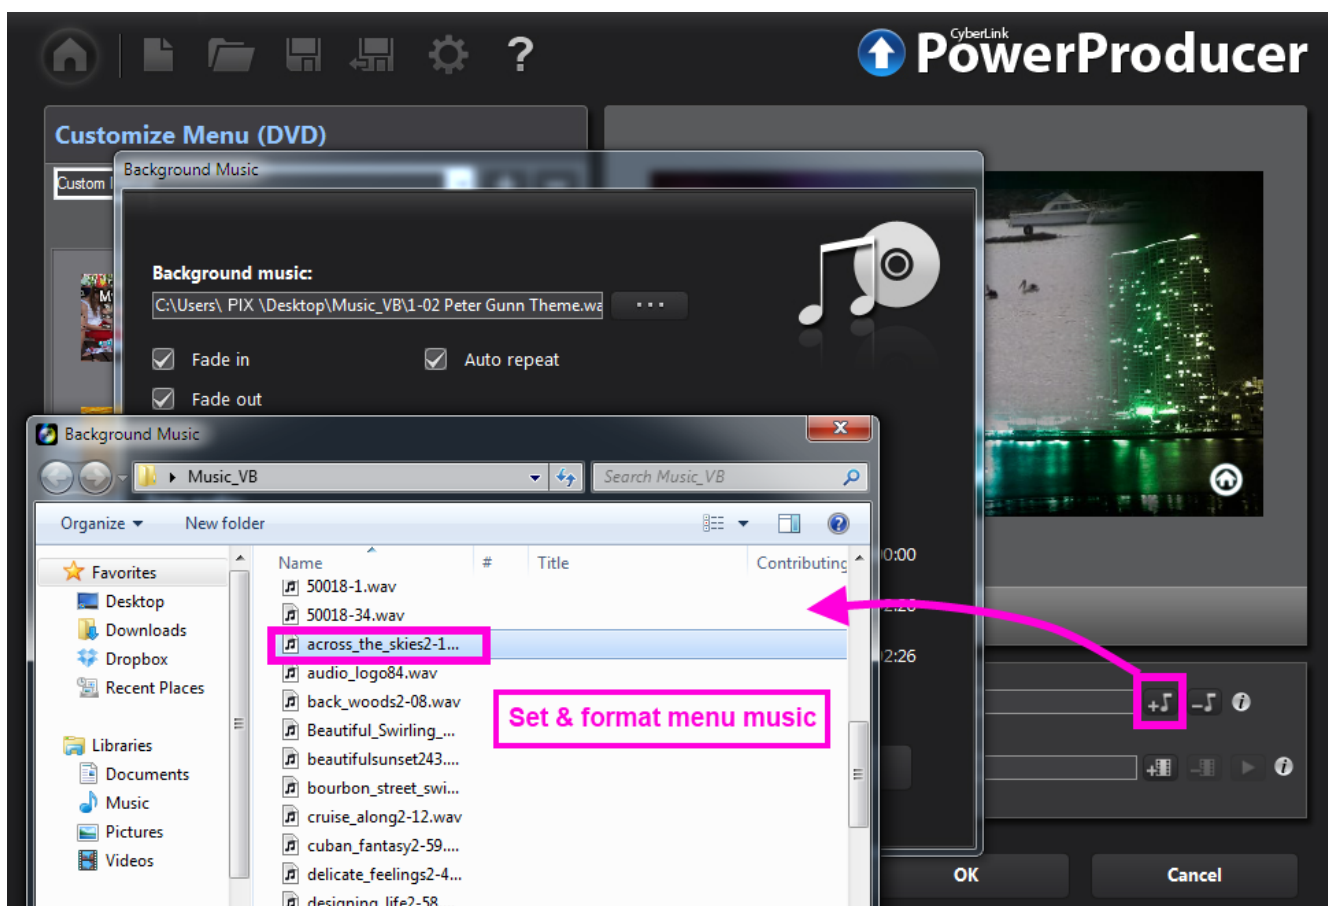

4. Click on text box – the T button - to modify text formatting. Place cursor inside text box to change words. Ctrl+A selects all text in box.

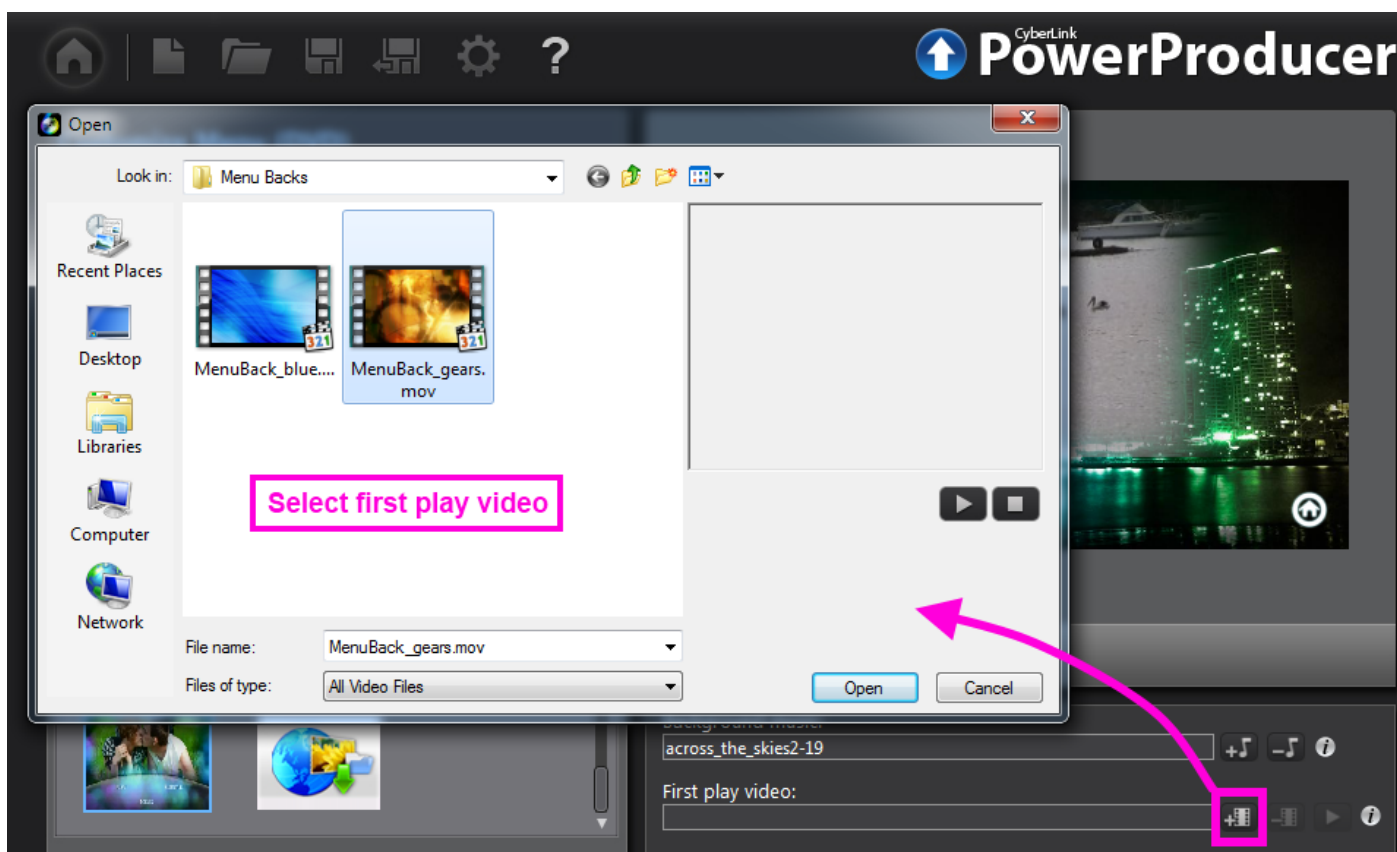

5. Click & drag to reposition text block & buttons

6. Click on + 🎵 to change menu music

7. Select first play video (if desired) – plays before menu starts.

8. Finally, preview the menu (home page & scenes pages) before burning disc.
