

CROP & PAN

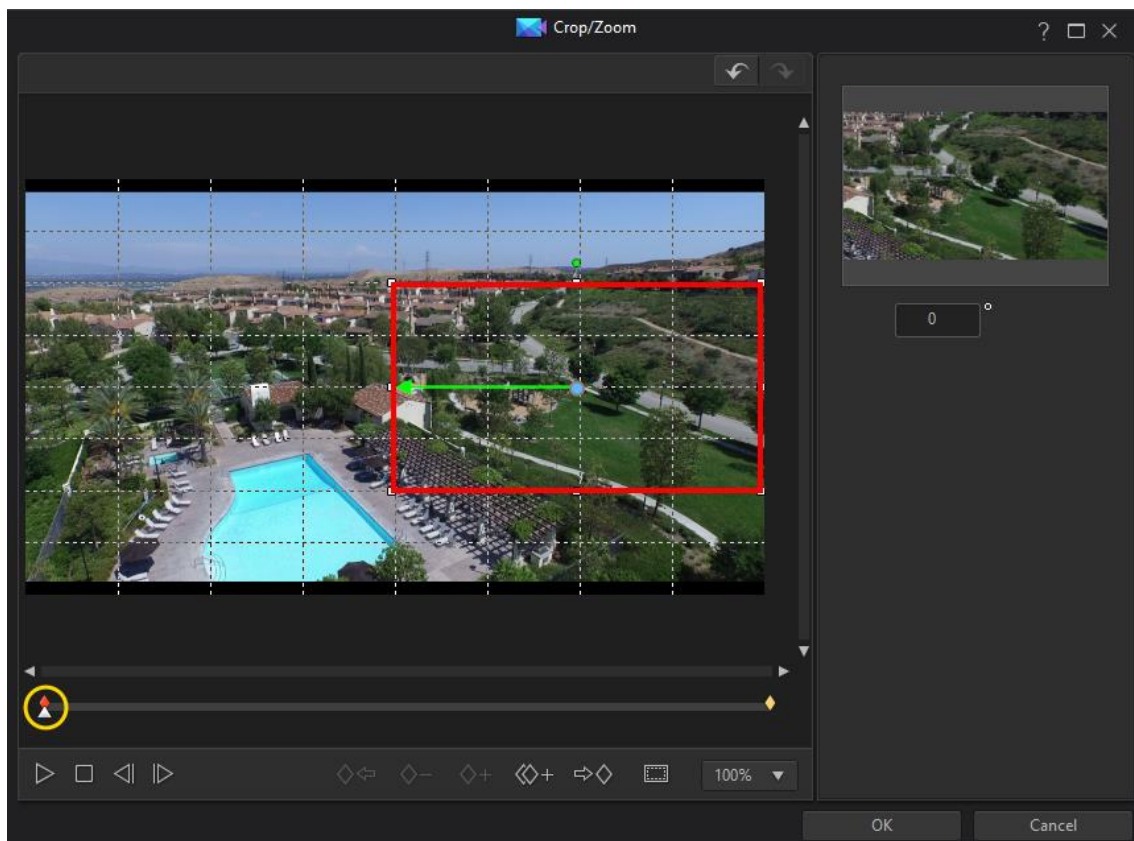

4K Source Video to 1080 Output

Step 1: Select clip > Tools > Crop/Zoom

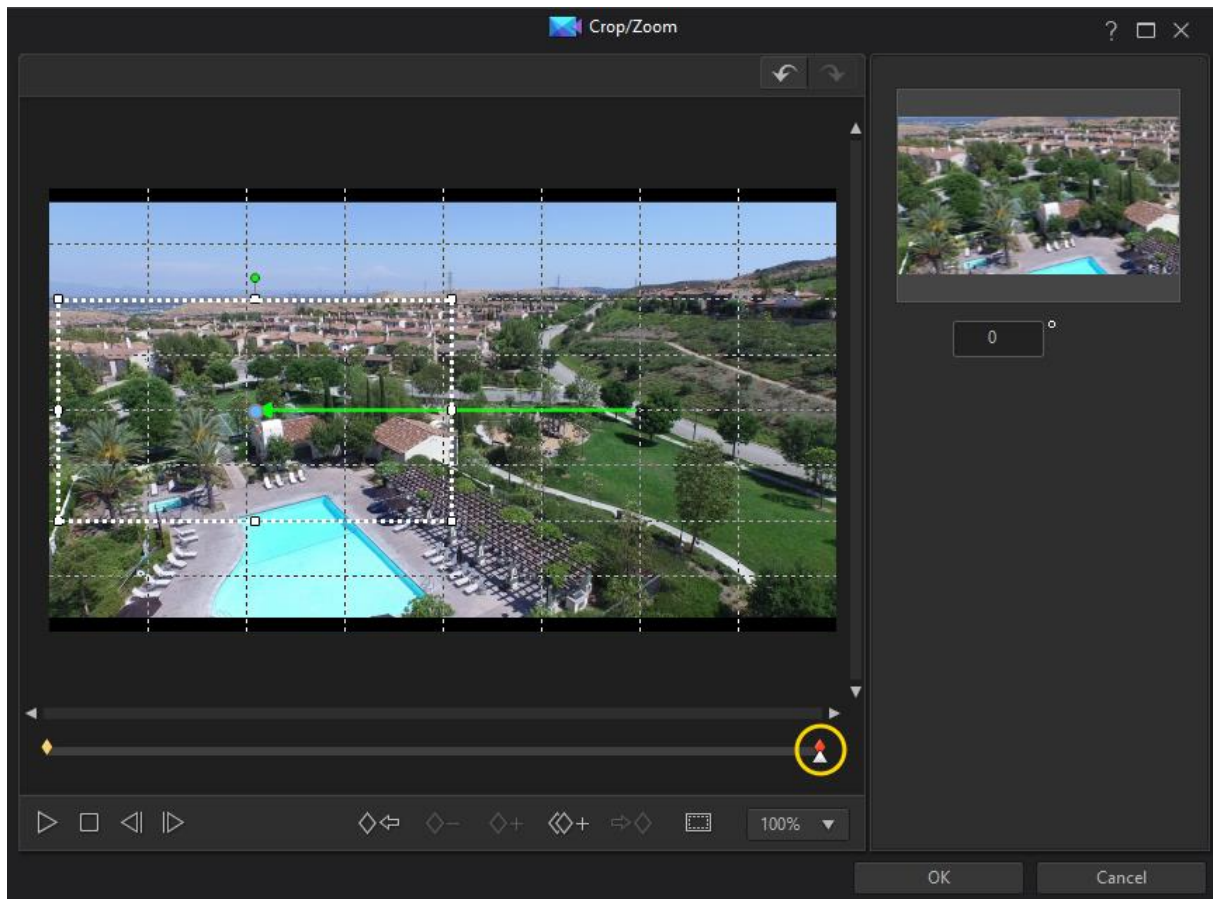

Start window looks like this – with no cropping

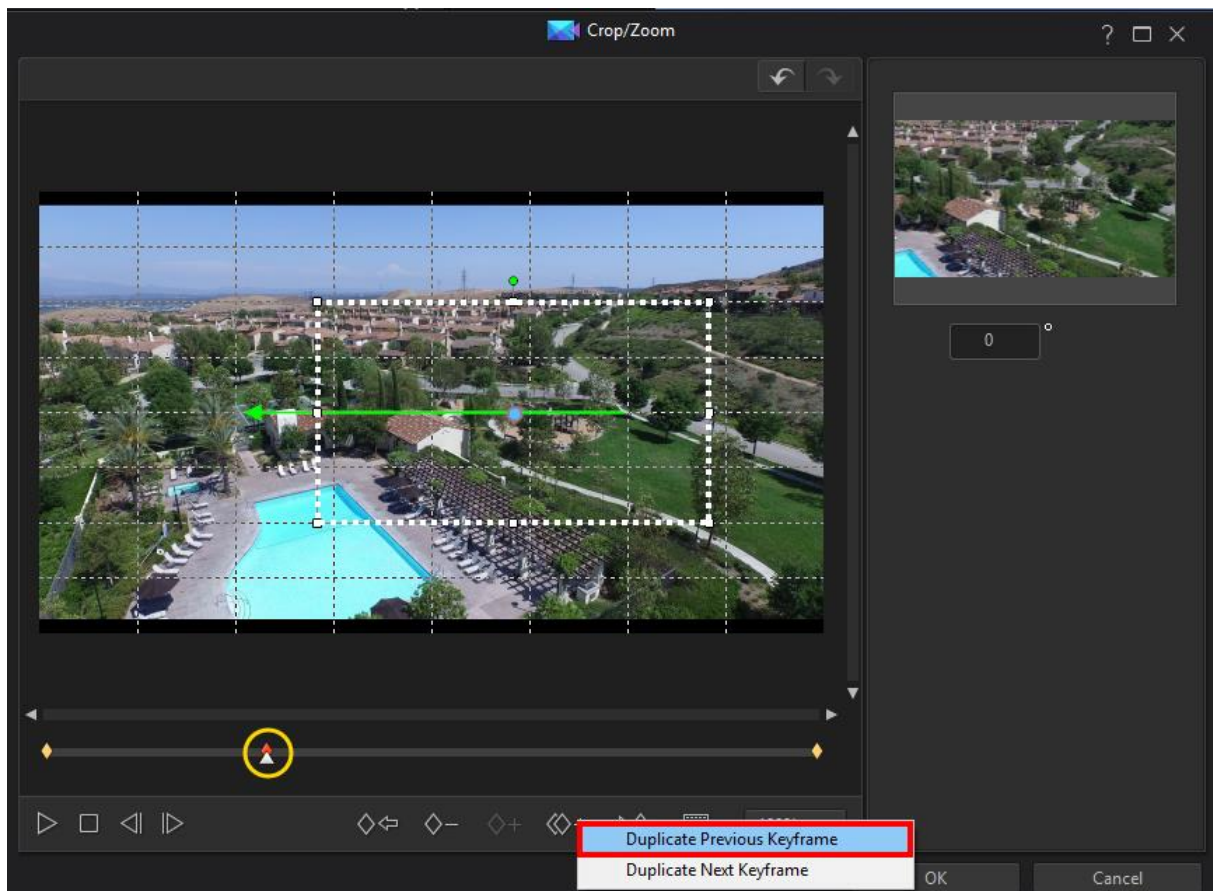

Step 2: Set first keyframe – starting position - resize & reposition crop area

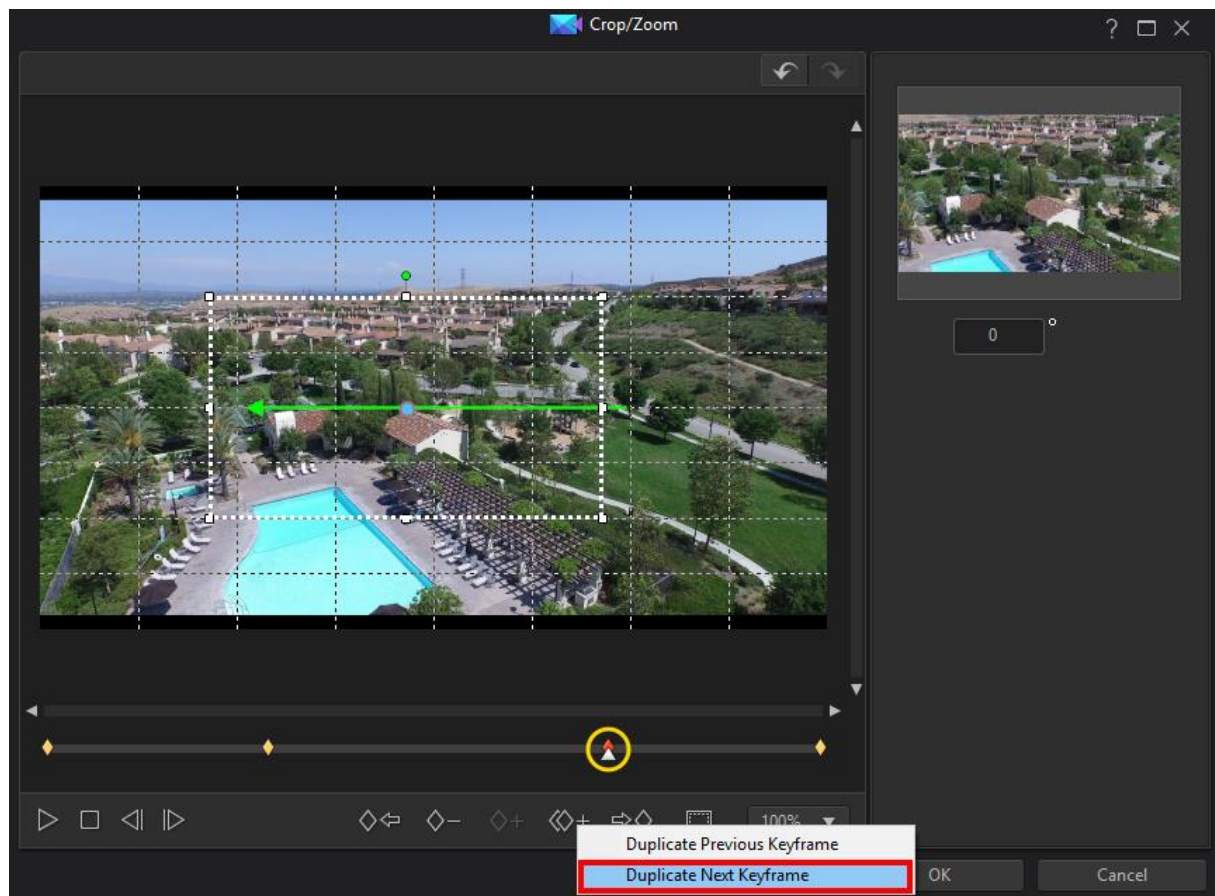

Step 3: Set last keyframe – where video will end. First duplicate previous keyframe to maintain crop size, then reposition (blue handle).

Step 4: Add central keyframe & Duplicate Previous (= no motion at start)

Step 5: Add central keyframe & Duplicate Next (=no motion at end)

Step 6: Review keyframe settings
