

Counter Projects

- ▶ There are 4 **Counter Projects**, which are simply titles. Each column of the counter is in a separate track, laid on a “blue screen” background to allow chroma-keying.
- ▶ The 4 projects go from 0 – 4999, 5000 – 9999, 10000 – 14999 & 15000 – 19999.
- ▶ To combine the projects, just use Insert Project
- ▶ The projects have been built in PDR12, so can be opened in PDR12, 13, 14, 15 & future versions.
- ▶ To extend the counter beyond 19999, just change 1 digit (10000 column) & save project as... the screenshot below turns the 10000 – 14999 project into 20000 – 24999. Simple.

Using a **produced file** (included with each packed project):

- counter can be resized & repositioned easily
- speed changes can be made
- chroma-key can be used on the blue for overlaying on video
- Fix/Enhance can be used to modify counter colour
- all position, scale, opacity, rotation & freeform keyframes can be applied
- any PiP Designer settings can be used
