C0401T01.JPG C0402T01.JPG C0403T01.JPG C0404T01.JPG

C0405T01.JPG C0406T01.JPG C0407T01.JPG C0408T01.JPG

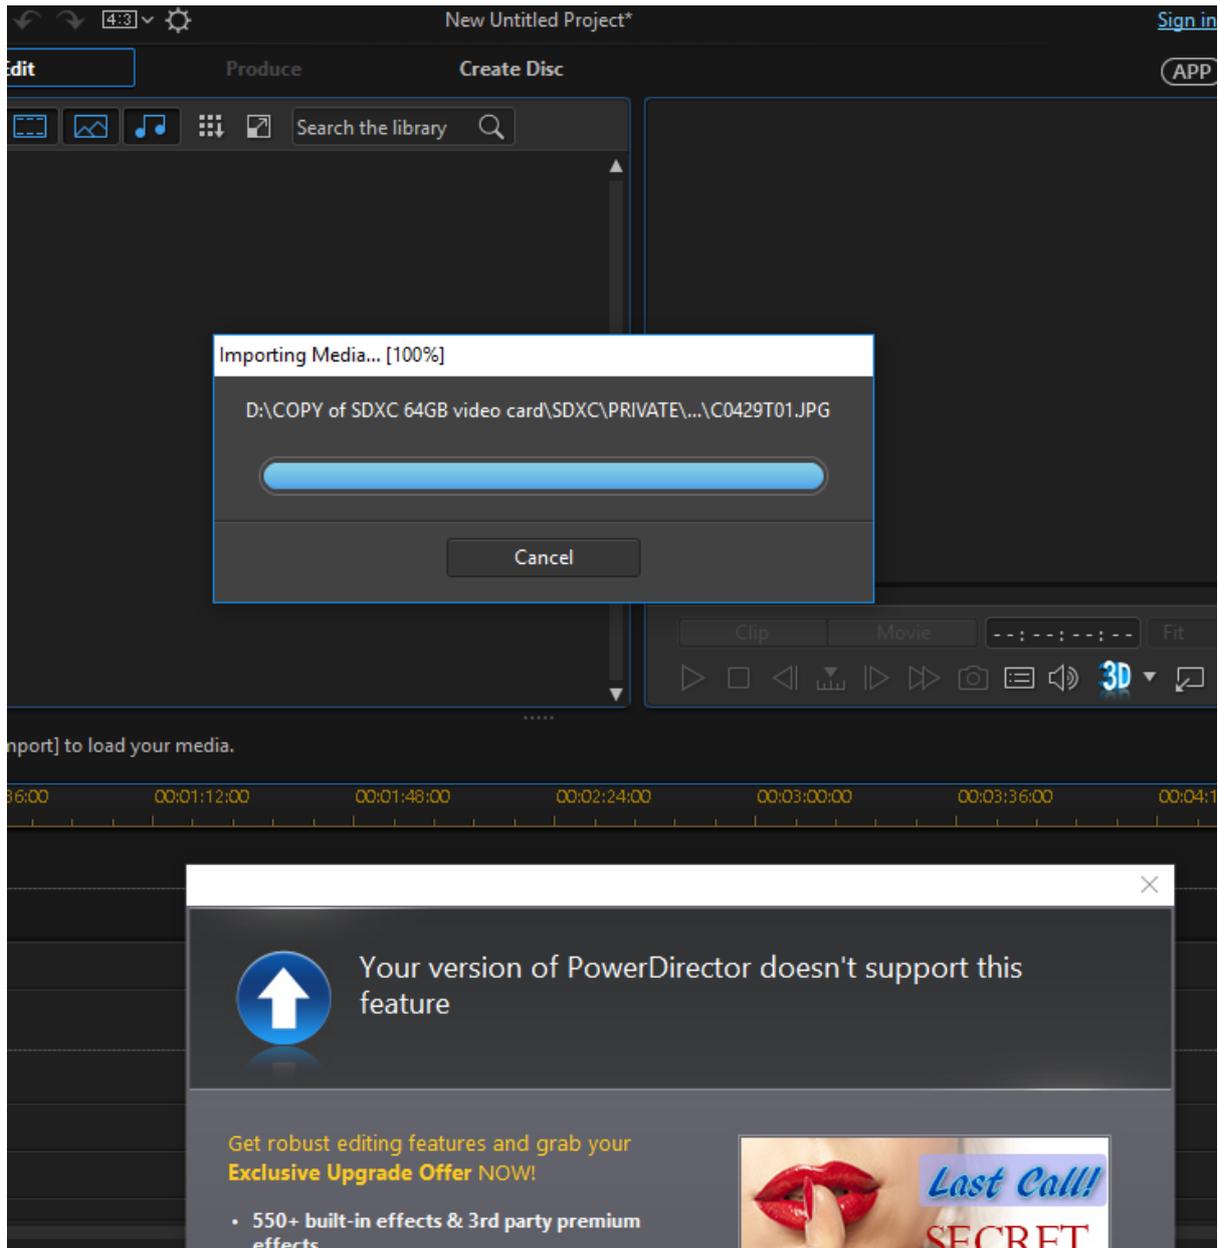

Click here or drag the selected clip to a selected track.

00:00:00:00 00:00:36:00 00:01:12:00 00:01:48:00 00:02:24:00

1. 

If I click the error X it returns to the previous screen.

If I drag away the error nox I get the Importing media box

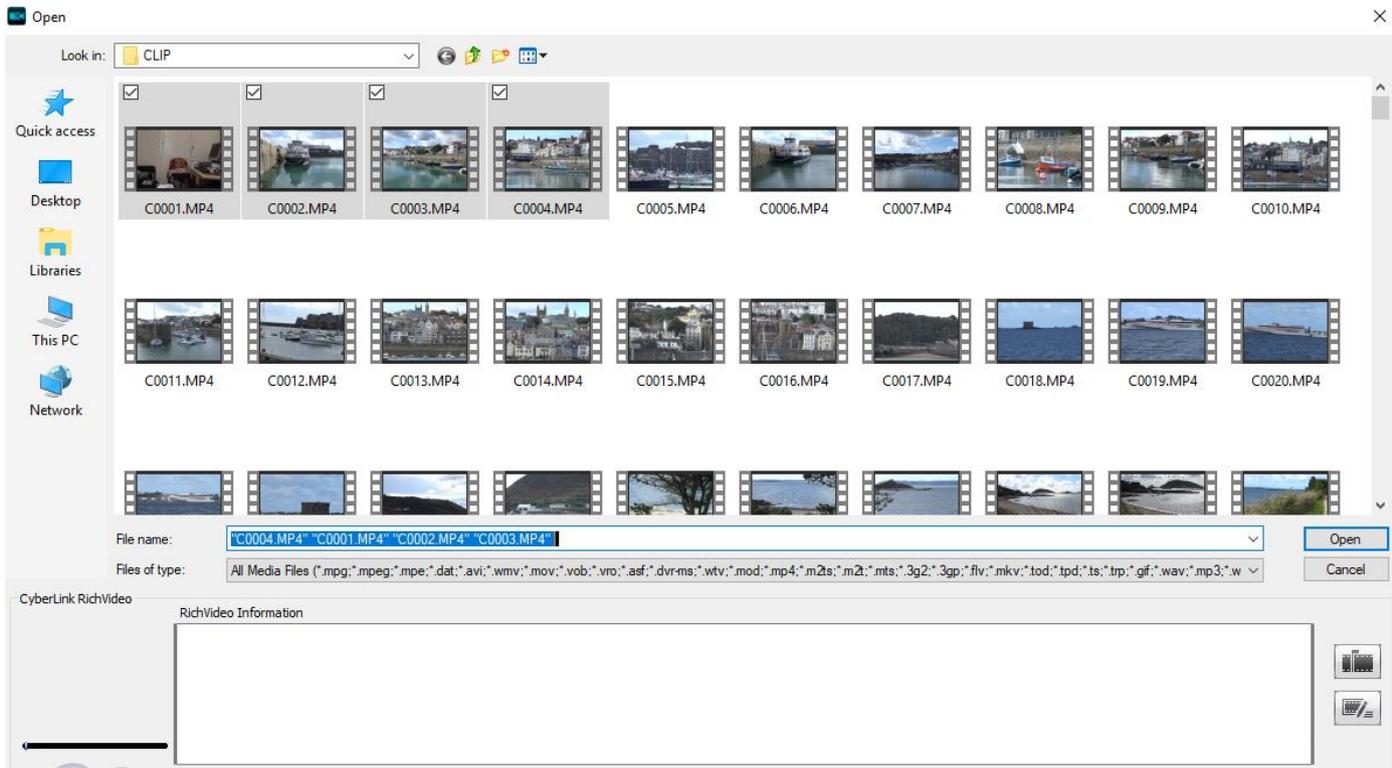

When I open the CLIP file within the copied SDXC contents.

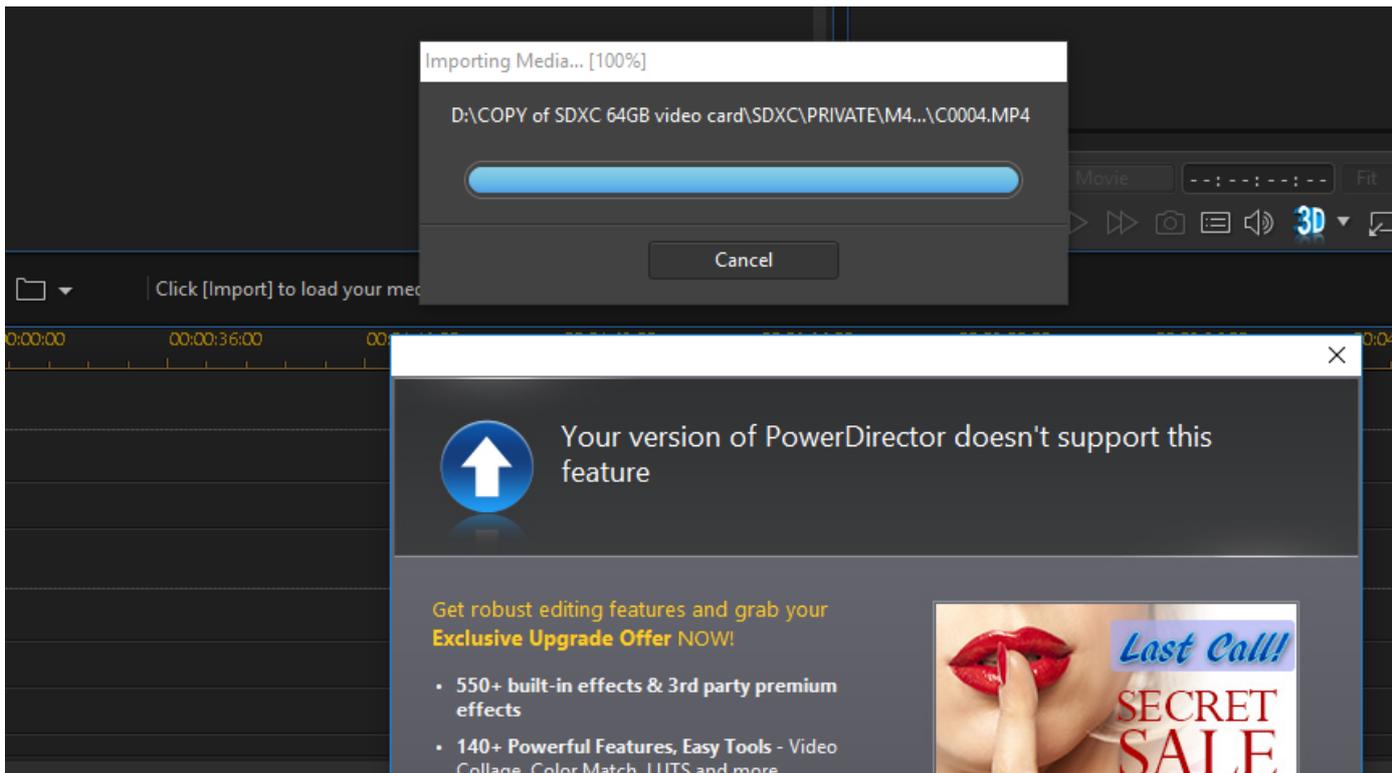

Copied to drive D by the way – I will try putting it on C:

From drive D: Open clip file lists allMP4s

Select 4 only as follows

As you see below the same events occur. This time the action bar lists the last of the 4 selected clips c004.\mp4

Whether using File -> Import

Or Vlick import then import \file, or

Right click on Media Box area, then Import ---etc

It always ends at the same .

I tried waiting for recode with only the 4 short clips but nothing develops further (no clips imported)

Tried importing from a file of 4 short clips only on drive C: in case that is important – same result as above.
