

Invert Image Colours Comparison

Several images were imported into different applications to compare how each performed with inverting image colours. The software selected was partly on the basis of this [CyberLink Blog post](#). Some other applications were added to the mix.

- CyberLink PhotoDirector 14 (2 methods compared)
- Adobe Lightroom
- Adobe Photoshop
- GIMP
- Photopus
- PhotoScape X
- Zoner PhotoStudio X

Inverting image colours may be done to convert a photo/slide/slide negative or as an effect.
