Hi Tony. Thanks for your reply. I re-installed everything. I do have wave editor, photonow and of course PD 9. I do not know why I am missing those other songs though (the free ones). I tried looking for .SDX and .SDS files but could not find them. I've attached a snapshot of my SmartSound screen. Please review the pdf file. I appreciate your answers. Thank you. Rob Boyle

Snapshot of my open PD program. All – 60 Style(s) was selected. "Clear Vision" to "Wild Chase" are the only free ones I get. Beyond that are the non bold ones and there are many of those...

Here's a snapshot of the windows that appear when I open the SmartSound files. I've tried rebuilding the database and everything goes back to the same screen "Clear Vision" to "Wild Chase." I'm not sure where I need to go from here. Thanks for reading this. I appreciate your suggestions...
